We estimate that the net proceeds from this offering (after deducting discounts to the underwriters and estimated expenses of the offering) will be approximately \$244.5 million. We intend to use the net proceeds from this offering to pay down a portion of the outstanding balance on our senior credit facility.

In addition, on April 30, 2008, we priced our public offering of 4,200,000 common shares at \$66.38 per share. We expect to receive net proceeds from that offering of approximately \$266.9 million, after deducting estimated underwriting discounts and offering expenses. In addition, we have granted the underwriters a 30-day option to purchase up to 630,000 additional shares of our common stock to cover over-allotments, if any. We intend to use the net proceeds from that offering, together with any net proceeds from any exercise of the underwriters' over-allotment option, to pay down a portion of the outstanding balance on our senior credit facility.

Any such amounts paid down on our senior credit facility with the net proceeds from this offering or the 4,200,000 share common share offering may be reborrowed from time to time for general corporate purposes including, but not limited to, acreage acquisitions.
